

## CiE App

Features that the App should have:

The CiE program

Users should be able to do the following:	Additional comments
<ul style="list-style-type: none"><li>• Scroll through classes</li></ul>	<ul style="list-style-type: none"><li>-The App version should be more user friendly than the printed and website versions, e.g. using icons /color to represent the 14 different departments; color-coding the classes (red, yellow and green)</li><li>-search function to locate classes easily</li></ul>
<ul style="list-style-type: none"><li>• view descriptions of classes</li></ul>	<ul style="list-style-type: none"><li>-The App version should be an improvement in comparison to the website, where the description is shown in a pop-up window.</li></ul>
<ul style="list-style-type: none"><li>• view campus/ location of classes</li></ul>	<ul style="list-style-type: none"><li>-to have an oversight of the selected location and be able to plan classes schedules accurately</li></ul>
<ul style="list-style-type: none"><li>• view lecture's contact data</li></ul>	<ul style="list-style-type: none"><li>-this should make communication between students and lecturers easier</li></ul>
<ul style="list-style-type: none"><li>• Bookmark classes as they scroll through them</li></ul>	<ul style="list-style-type: none"><li>-this should make selecting classes as easy as possible</li></ul>
<ul style="list-style-type: none"><li>• Put classes they potentially want in a shopping cart</li></ul>	<ul style="list-style-type: none"><li>-to have an oversight of the selected classes</li><li>-to keep count of how many ECTS have already been earned. (idealistically this should occur automatically, which means there is a connection between some kind of central database, keeping score whether the students have in fact earned the ECTS by completing the classes)</li></ul>

The sign-up process

Users should be able to do the following:	Additional comments
Select classes and sign up for them	<ul style="list-style-type: none"><li>-Idealistically classes that are selected by students should be directly saved in the Primuss system (which is, as mentioned in class, not the case at the moment)</li><li>-if it is not possible to save directly in Primuss, then there should be a link to open the selection process in a browser, so students can sign up for classes as it has been done so far with a computer on the internet.</li></ul>

Keep track of all my CiE

Users could be able to do the following:	Additional comments
List of CiE for this semester	Have a list of CiEs enrolled in the current semester
Timetable for CiE for this semester	Display a timetable/schedule for the current semester (potentially add other classes manually as well) Alternatively, use a calendar (e.g. Google calendar) as a timetable. Easily/automatically add CiEs to the calendar.
Keep track of CiEs taken in previous semesters	List of CiEs taken throughout all semesters at MUAS. This feature is targeted for students who wish to apply for the CiE Certificate. This feature could show a progress bar and assist with the application for the certificate at the 'Prüfungsamt'.

Note:

Regular German students of the university do not sign up through this process, which has been specifically designed for the international students. German students sign up in their respective department directly, or through Primuss (for example CiE courses of department 13, which are also AW Fächer)

Hence, there should be a way to prevent the German students from attempting to sign up through the process intended for international students. For example, when the App is installed, it asks whether the user is an international or regular German student, and the App can turn off the sign up feature for the regular German student.

More suggestions for a solution are much welcome.
